

Cylinder Gas Electronic Specialty Gas Liquid Nitrogen Trifluoride NF3 Gas

Basic Information

. Place of Origin: China . Brand Name: CMC COA · Certification: NF3 Model Number: • Minimum Order Quantity: 1kg • Price: US \$50/kg Cylinder/Tank · Packaging Details: • Delivery Time: 15 days Payment Terms: L/C, T/T . Supply Ability: 5000kg/month

Product Specification

• Boiling Point:

Product Name: Nitrogen Trifluoride Gas

-129.0 ºC

• Melting Point: -206.79 °C

• Appearance: Colorless, Odorless

Cylinder Pressure: 15MPa/20MPa
 Valve: Diss640
 Cylinder Standard: DOT/ISO/GB
 Transport Package: Sea Transportation

Specification: 47L, 440L
Trademark: CMC
Origin: China
HS Code: 28129011
Supply Ability: 5000tons/Year
CAS No.: 7783-54-2
Formula: NF3

Product Description

Electronic Specialty Gas Cylinder Liquid Nitrogen Trifluoride NF3 Gas

Nitrogen trifluoride gas (NF₃) is a chemical compound composed of nitrogen and fluorine. It is a colorless, odorless gas with a molecular formula of NF₃. Here are some key points about nitrogen trifluoride gas:

Formation: Nitrogen trifluoride is typically produced by the reaction of nitrogen gas (N_2) with fluorine gas (F_2) . The reaction can be represented as follows:

 $N_2(g) + 3F_2(g) \rightarrow 2NF_3(g)$

Physical properties: Nitrogen trifluoride is a nonflammable gas that is stable at normal temperatures and pressures. It has a boiling point of -129.1 °C (-204.4 °F) and a melting point of -206.6 °C (-339.9 °F). It is non-reactive with most metals, nonmetals, and common materials at room temperature.

Chemical properties: Nitrogen trifluoride is a powerful oxidizing agent and is highly reactive. It readily reacts with water vapor in the air to form nitrogen dioxide (NO2) and hydrofluoric acid (HF). It can also react with various other compounds, such as alkali metals and metal hydrides. Uses: Nitrogen trifluoride has several industrial applications. It is primarily used in the electronics industry as a plasma etching gas for cleaning and etching silicon wafers during the production of semiconductors. It is also used as a cleaning agent for removing residues from the interior surfaces of equipment used in the manufacturing of electronic components. Additionally, NF3 is used in the production of specialty chemicals, as a refrigerant, and in some lithium-ion batteries.

Environmental impact: Nitrogen trifluoride is a potent greenhouse gas with a high global warming potential (GWP). Its GWP is significantly higher than that of carbon dioxide (CO₂) over a 100-year time frame. NF₃ is relatively stable in the atmosphere and has a long atmospheric lifetime, contributing to its potential impact on climate change. Efforts are being made to monitor and reduce the emissions of nitrogen trifluoride to mitigate its environmental effects.

It's important to note that if you are working with or handling nitrogen trifluoride gas, it should be done so with caution. Proper safety protocols, including the use of appropriate protective equipment and adherence to handling guidelines, should be followed.

Basic Info

Transport Package: 47L, 440L Melting Point -206.79°C

Trademark: CMC Boiling Point -129.0°C

Specification 99.99%, 99.996% Production Capacity 5000 M3/Year

Cylinder Pressure 15MPa/20MPa Valve Diss640

Appearance Colorless, Odorless Density 2.96 Kg/M3

Specifications:

Specifications	Company Standard
NF3	≥ 99.996%
CF4	≤ 20 ppm
N2	≤ 5 ppm
O2+AR	≤ 3 ppm
CO	≤ 1 ppm
CO2	≤ 0.5 ppm
N2O	≤ 1 ppm
SF6	≤ 2 ppm
Moisture	≤ 1 ppm
Express as HF	≤ 1 ppm

Company Profile

Shanghai Kemike Chemical Co., Ltd is staffed by trained personnel, combine many years experience in Gas industry .We supply cylinder gas, electronic gas, etc., and the gas holder, panel, valves and fittings and other equipment, parts and engineering services to our customers in China and worldwide; The products are involved in various industrial fields, such as semiconductor chip, solar cell, LED, TFT-LCD, optical fiber, glass, laser, medicine, etc., Our mission is to partner with our global customers to provide support, solutions and quality products that are innovative, reliable, and safe.

Our products mainly include: H2, O2, N2, Ar, CO2, propane, acetylene, helium, laser mixed gas, SiH4, Sih2cl2, SiHCL3, SiCL4, NH3, CF4, NF3, SF6, HCL, N2O, doping mixed gas (TMB, PH3, B2H6) and other electronic gases.
